

PROCESSING A CASH SALE IN POS

Purpose

This SOP outlines the correct steps to process a **basic in-store sale using Cash or EFTPOS** in Pronto Xi, ensuring transactions are completed accurately and efficiently.

When to Use This SOP

Use this process when:

- A customer is purchasing items in store
- No special pricing, backorders, or finance is required
- Payment is made via **Cash or EFTPOS**

Step 1: Log Into POS

- Log into **Pronto Xi POS** using your staff credentials.

Expert Advice, Great Price

Step 2: Select or Create a Customer Account

- 1. Search for the customer using name, phone number, or email.
- 2. If the customer does not exist, create a **new customer account** with the required details.
- 3. Confirm the correct customer account is active before proceeding.

Step 3: Add Product to the Sale

- 1. Locate the **ITEM SEARCH** field.
- 2. Either:
 - Scan the product barcode, **or**
 - Search for the product manually.
- 3. If searching manually, ensure:
 - The **correct product** is selected
 - The correct **SKU, description, and price** are shown

Step 4: Select Payment Method

1. Once all items are added, proceed to payment.
2. Select the appropriate payment method:
 - **Cash**
 - **EFTPOS**
3. Enter the **amount tendered**:
 - **Cash:** Can be greater than the total (change will calculate automatically)
 - **EFTPOS:** Must be the **exact amount**
4. Press **Enter** to confirm:
 - EFTPOS will automatically populate the **full amount or deposit amount (if backordered)**

Step 5: Select Invoice Delivery Method

1. When prompted, select the preferred method of invoice delivery:
 - **P** = Print
 - **E** = Email
 - **B** = Both
 - **N** = None
2. Confirm and finalise the transaction.

Key Notes & Tips

- Always confirm the **correct customer account** before payment
- EFTPOS transactions must be for the **exact sale amount**
- Ensure invoice delivery method matches the customer's preference
- If a mistake is made, stop and seek assistance before finalising
