

Changing Warehouse for Stock Dispatch in Pronto

You can change the warehouse from which stock will be dispatched without altering the sale territory. This method is preferred because:

Clear Dispatch Instructions: The selected warehouse (e.g. Sydney) will print a picking slip, avoiding confusion about product SKU or delivery address.

Tracking Visibility: Everyone can see the tracking details on the customer sale, making it clear that the stock came from Sydney. This avoids confusion from the old email/paper transfer method.

Steps to Change the Warehouse:

1. **Open the Order:** In POS, find the purple "Delivery Options" box.

The screenshot shows the Pronto POS interface for a sale at Ted's Cameras. The interface includes a top navigation bar with various system links, a central order entry area, and a bottom menu with various transaction options.
