

Processing Credits in Pronto XI

Types of Credit Claims we can make

Currently there are two options for credit claims in Pronto:

1. Purchase Return – where we send the product back and are credited.
2. Purchase Exchange – where the item is replaced by our supplier.

Where unsure, contact the supplier to find out which option to use before proceeding – for example Manfrotto tripods are repaired and returned by Videndum, rather than being replaced.

Before beginning:

Any letters underlined in these instructions will be keyboard shortcuts you can press to help speed up the process, for example, if you see the word “Select” you can press the “S” key instead of clicking the button.

Each supplier has their own requirements and process for making a claim, you can find the instructions on ConnectEd under the Pronto Operations manual chapter 4.0 – Pronto Credits: <https://teds.opcentral.com.au/#/operations/manual/13>

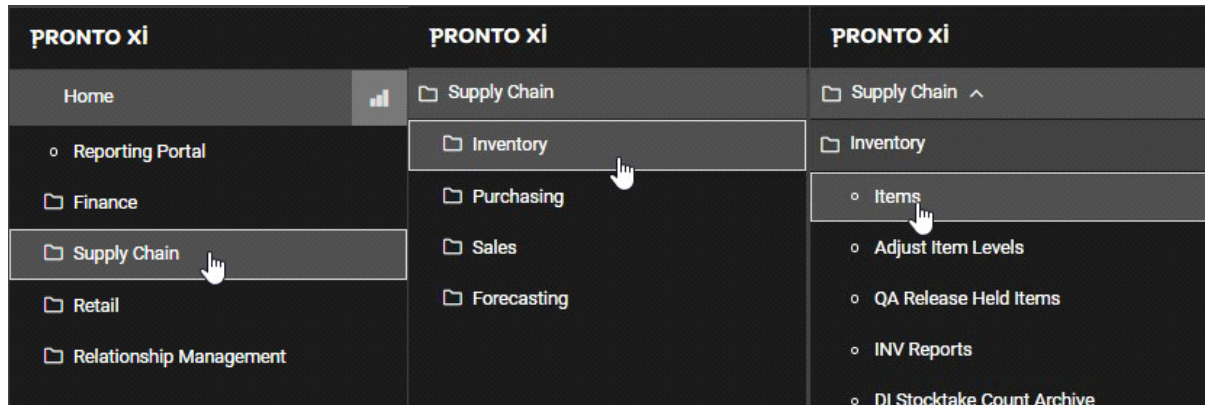

After working out what additional documents are required (sales invoices, RA forms etc.) you can begin the process in Pronto.

Initial Steps

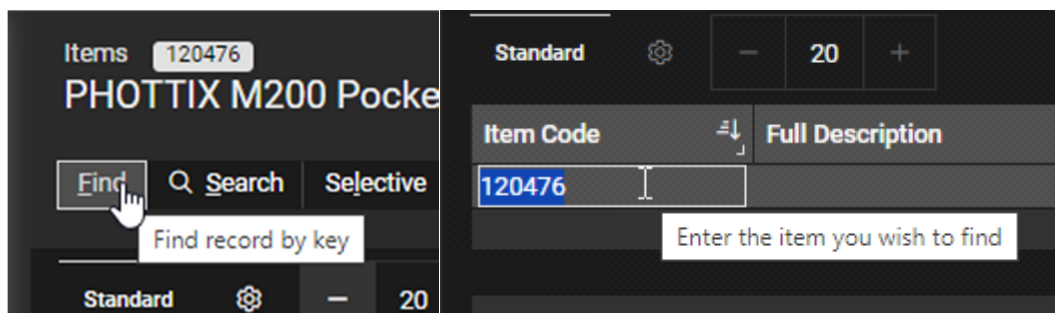

First step in processing a credit claim is to find the faulty product’s original purchase order. This step is the same for both Purchase Returns and Purchase Exchanges.

If you have added the product to QA Hold to remove from available to sell, you’ll need to release it before proceeding – this will be the exact same procedure as releasing second hand gear for sale after the 7 day hold period.

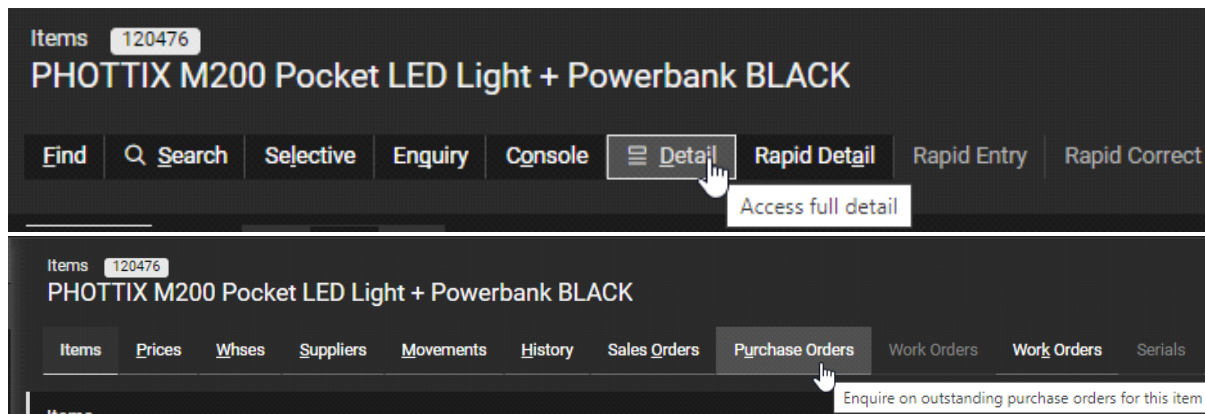

Navigate to the Items page in the Inventory tab – Supply Chain – Inventory – Items

In the Item window, press “Find” and type in the product code of the faulty product.

Then press “Detail” and then “Purchase Orders”

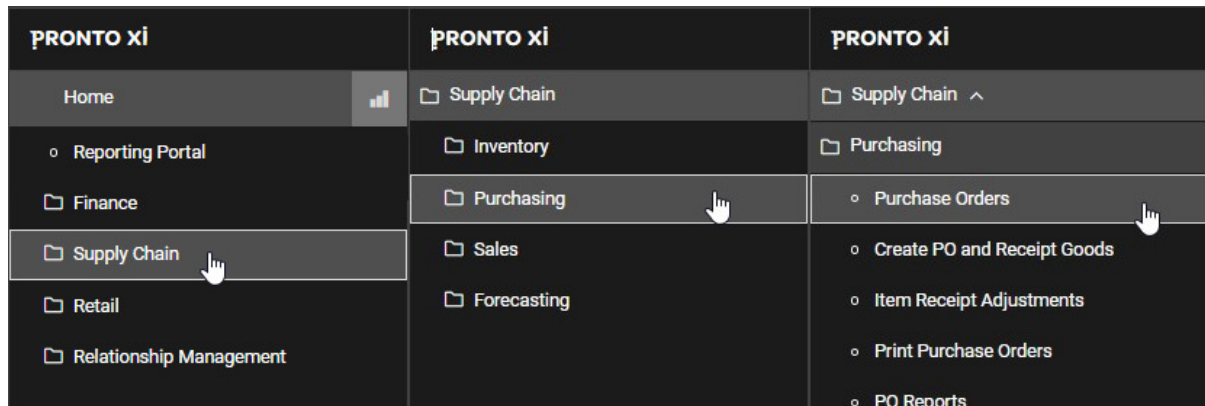

In this window, if you haven’t already, you may want to set up a filter showing just your store’s purchase orders – if unsure you can contact me on how to do so.

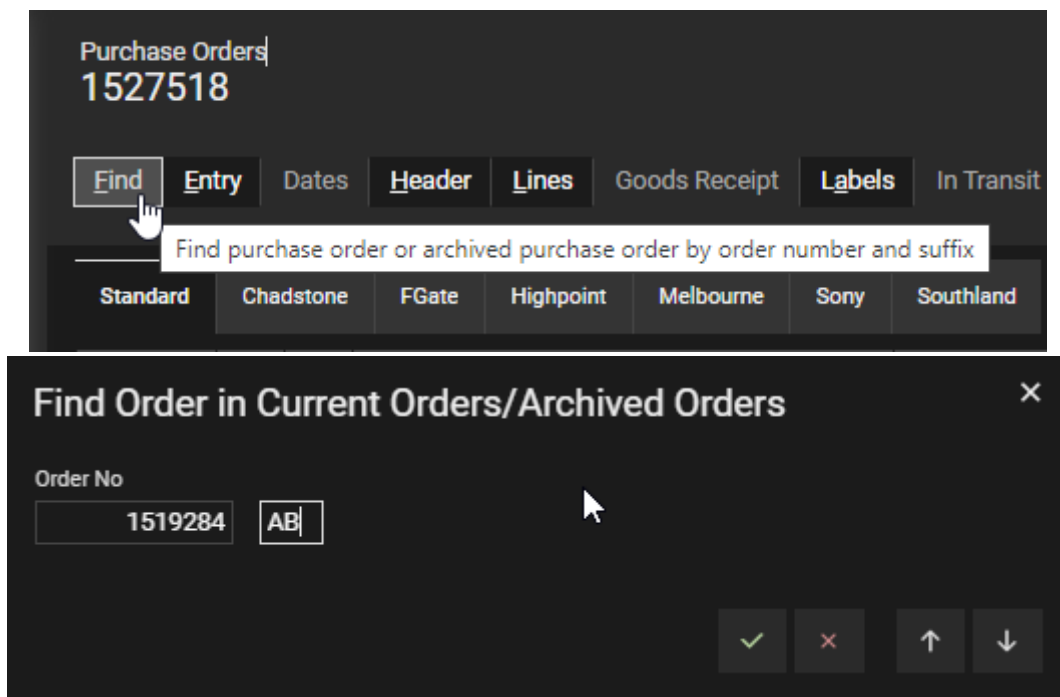

Purchase Orders										
Standard		235	Chadstone	Doncaster	FGate	Southland				
Order...	B #	Supplier	Name	Ordered	W...	Description	Ordered	In Transit Qty	Received	Expected

1504129		S5005100	VIDENDUM MEDIA DISTRIBUTION AUSTRAL...	22-SEP-2023	3301	Melbourne	4	0	0	22-SEP-2023
1504129	AA	S5005100	VIDENDUM MEDIA DISTRIBUTION AUSTRAL...	22-SEP-2023	3301	Melbourne	4	0	0	22-SEP-2023

Look for a purchase order that’s listed as having received stock, and make note of it, including any suffix, and make note of it. The most recent PO dated prior to the sales invoice (if present) is best.

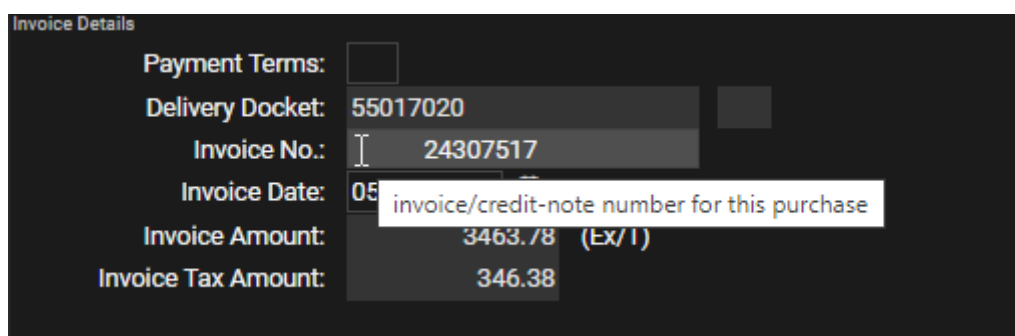

Next is to find the supplier's invoice number, to do that navigate to the Purchase Orders screen – Supply Chain – Purchasing – Purchase Orders.

In the Purchase Orders window, press “Find” and enter the purchase order number noted earlier, remembering to add any suffix.

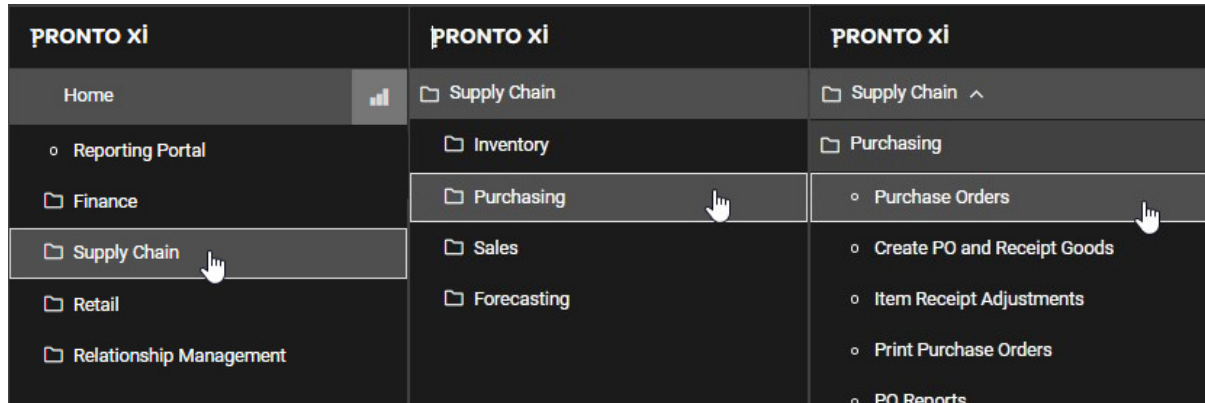

With the correct purchase order selected, press “Header – at the bottom of this page under “Invoice Details” make note of the invoice number listed.

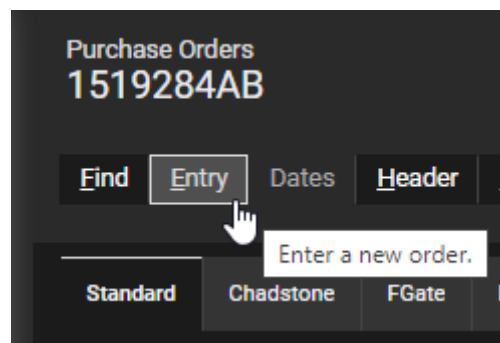

This is everything we need to get started.

Creating a Purchase Return

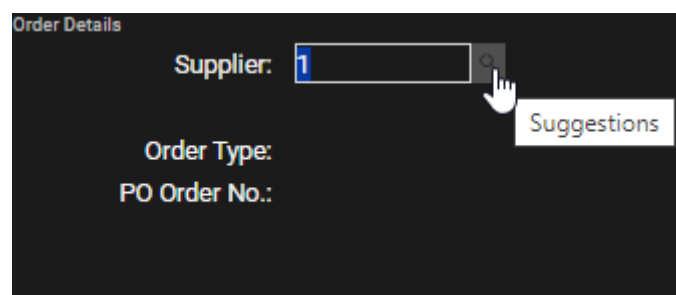

To create a purchase return or purchase exchange, navigate to the Purchase Orders page –Supply Chain – Purchasing – Purchase Orders.

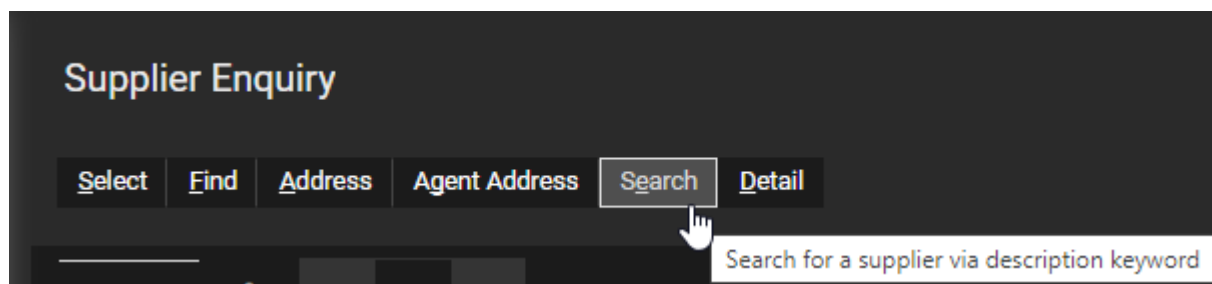

In the Purchase Orders screen press “Entry”

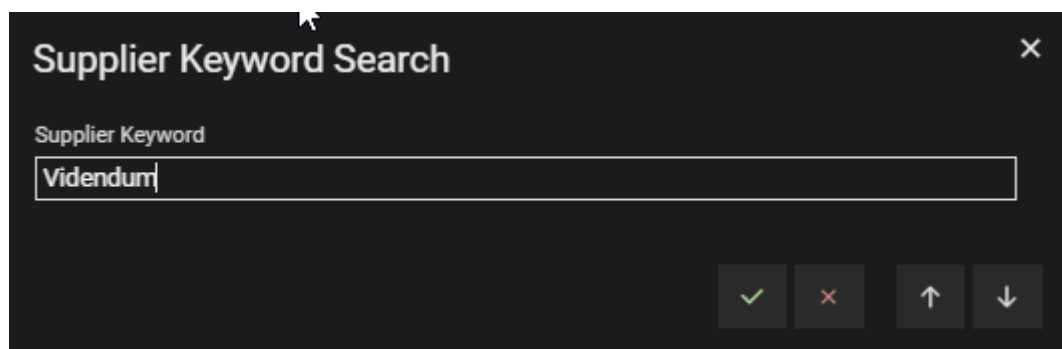

In the “Order Details” section, in the “Supplier” field type in the supplier number if known, or click the Magnifying Lens icon or press “F2”

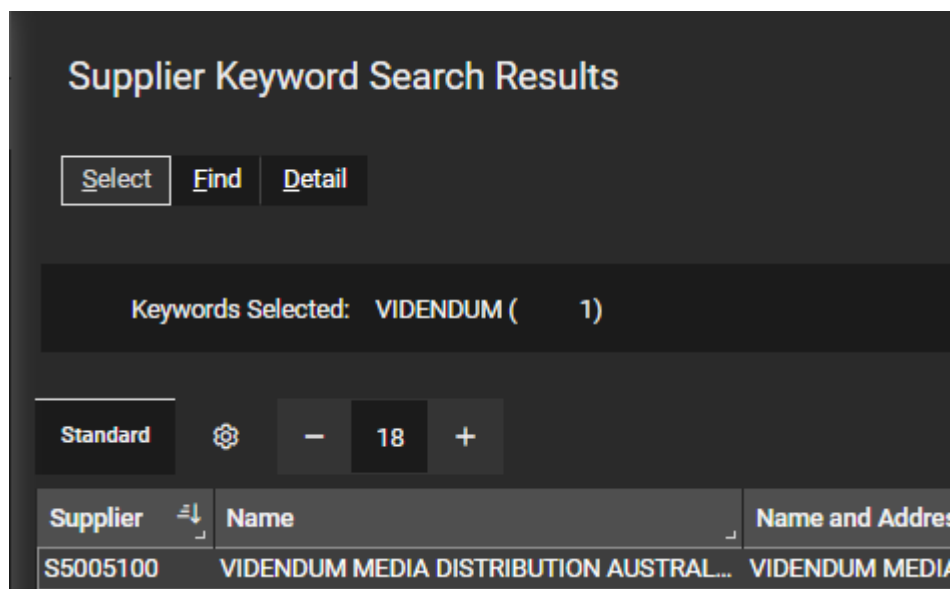

In this page, "Supplier Enquiry" click "Search"

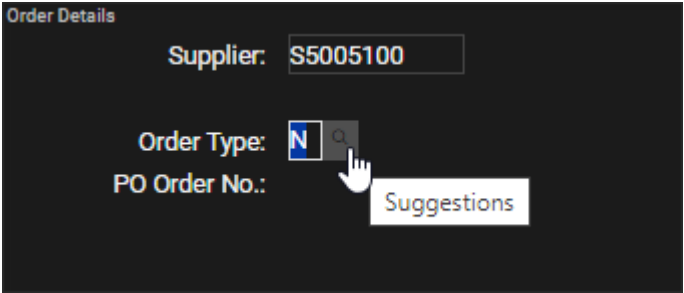

Type the supplier name and press "Enter"

Make sure the correct supplier is highlighted and click "Select"

In the “Order Type” field, press the Magnifying Lens icon or press “F2”

Order Details

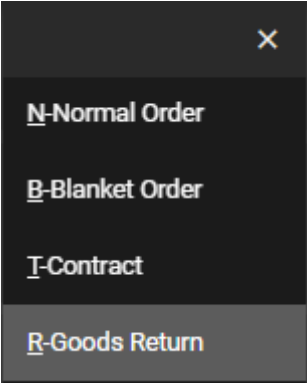

Supplier: S5005100

Order Type: N

PO Order No.:

Select the option “R-Goods Return”

X

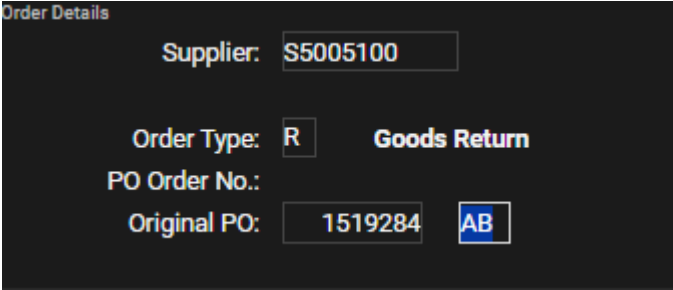

N-Normal Order

B-Blanket Order

I-Contract

R-Goods Return

In the “Original PO” field type in the purchase order number found in the “Initial Steps” section, remembering to add any required suffix.

Order Details

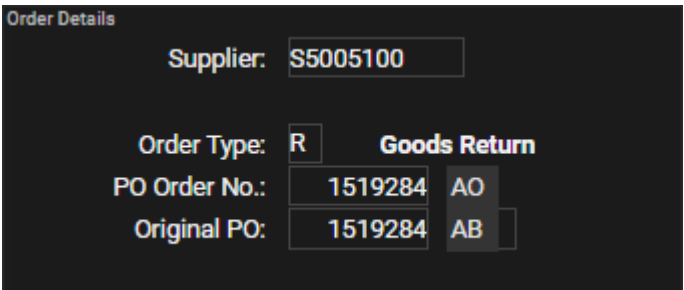

Supplier: S5005100

Order Type: R Goods Return

PO Order No.:

Original PO: 1519284 AB

Pronto will then generate a new suffixed purchase order for this return.

Order Details

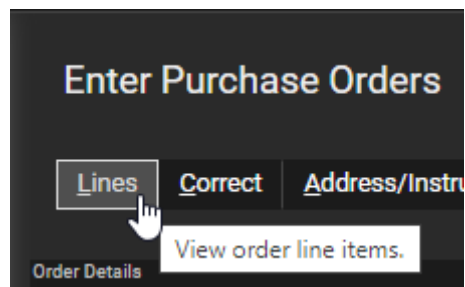

Supplier: S5005100

Order Type: R Goods Return

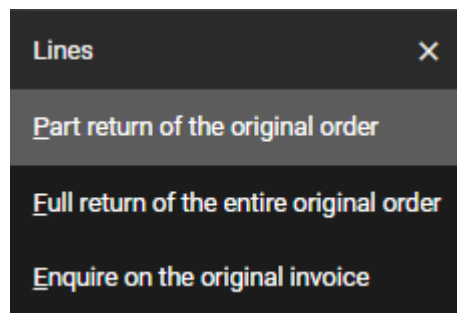

PO Order No.: 1519284 AO

Original PO: 1519284 AB

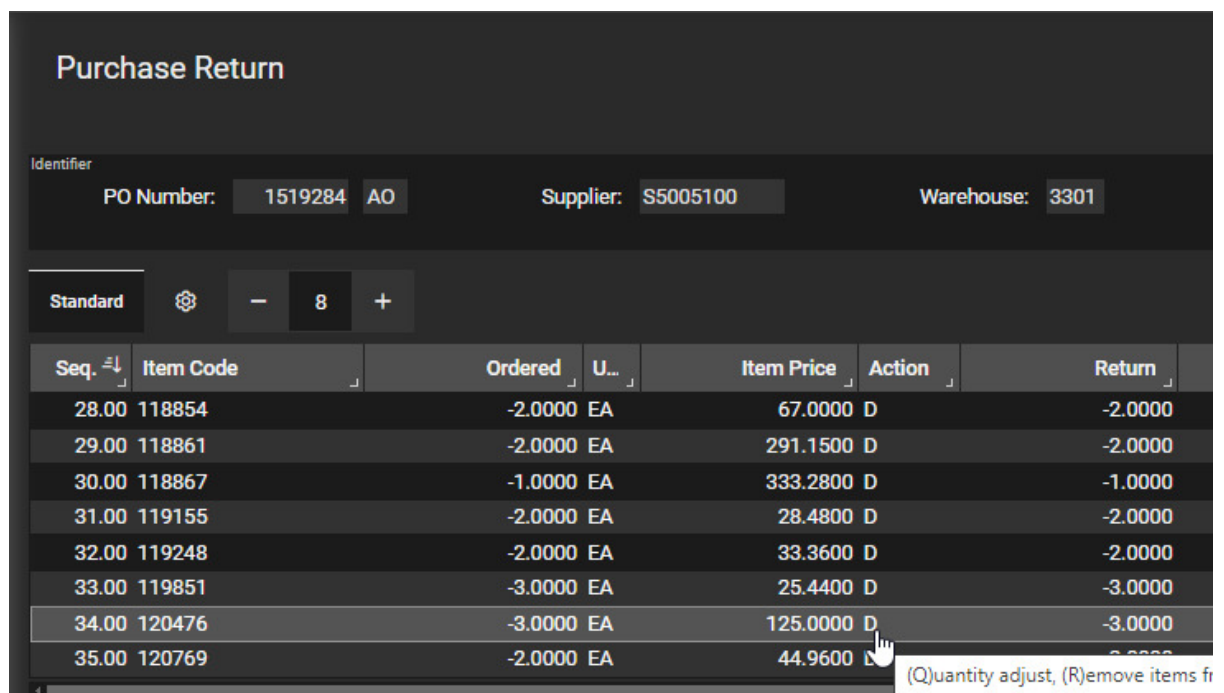

From here, keep pressing enter until the heading options appear and press “Lines”

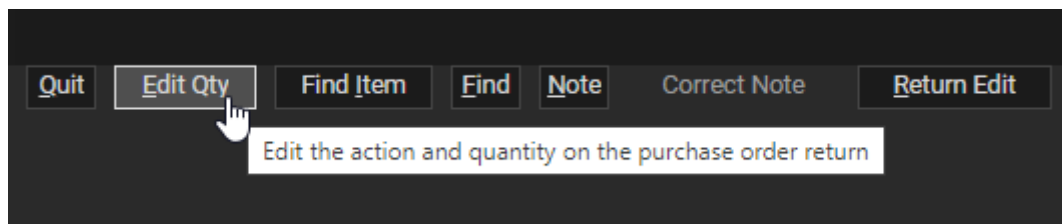

Choose “Part return of the original order”

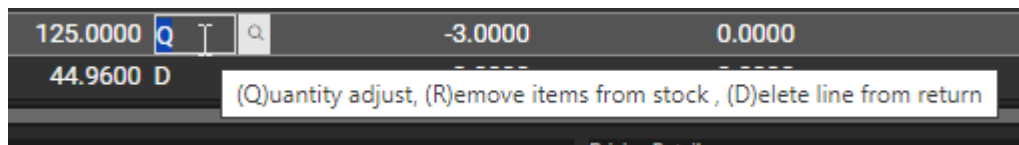

In the Purchase Return screen, select the product being returned.

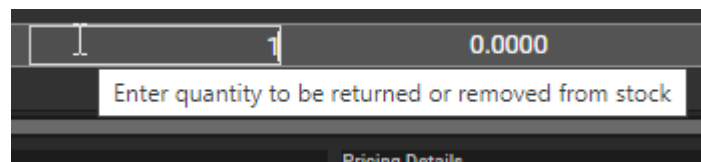

Press the “Edit Qty” button

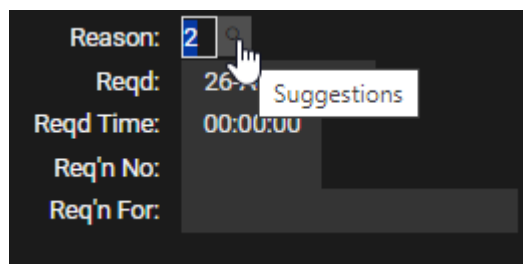

Make sure “Action” field is marked with “Q” and press “Enter”

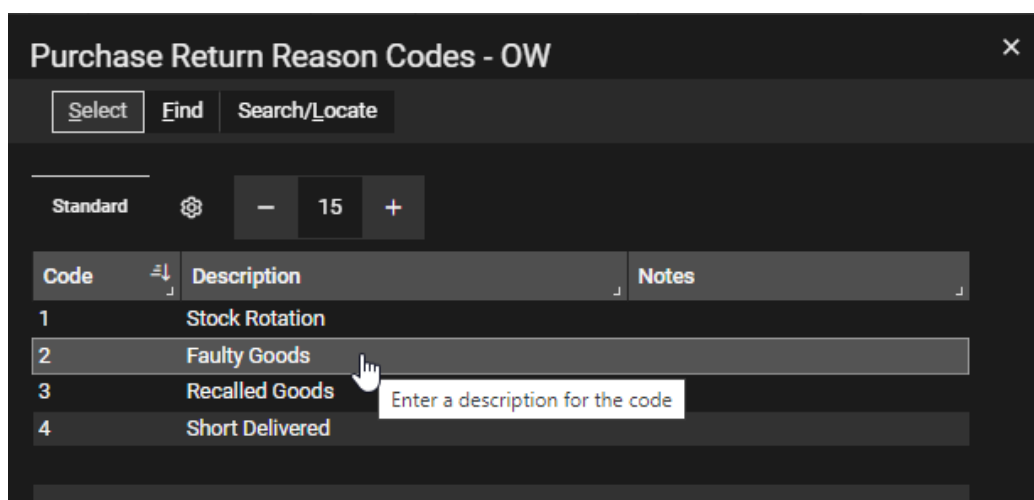

In the “Return” field type the quantity being returned and press “Enter” twice

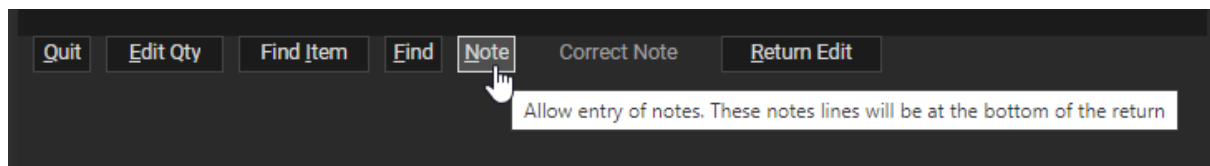

In the “Reason” field press the Magnifying Lens icon or press “F2”

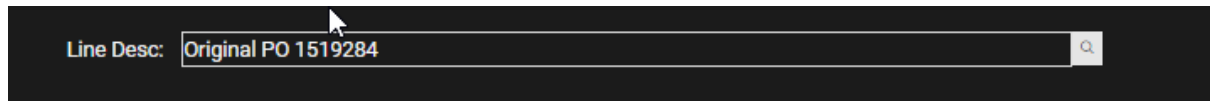

Highlight the most appropriate option for the return and press “Select”

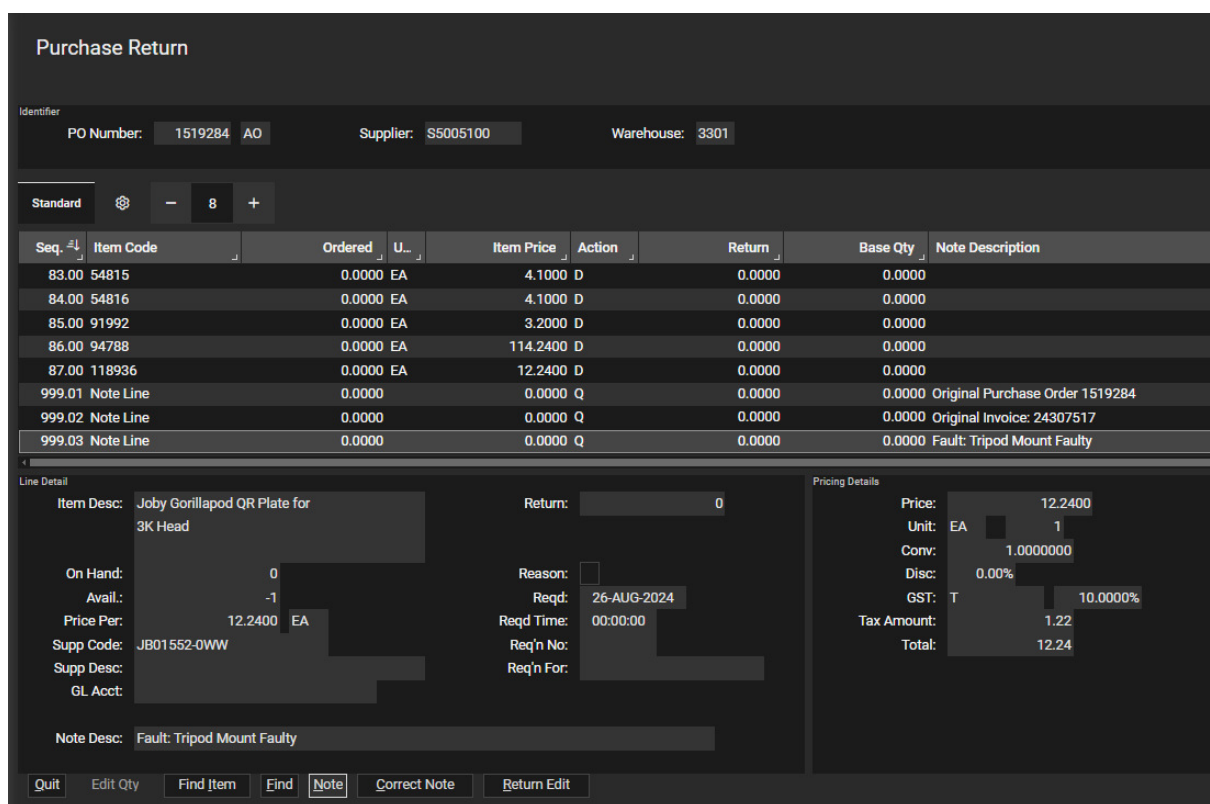

Next we have to add notes by pressing the “Note” button

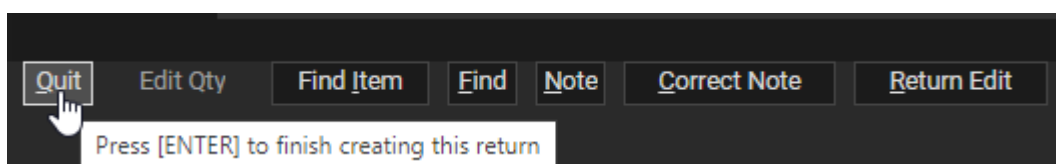

Type in the original purchase order number, the original invoice number, and the fault description, pressing “enter” twice each time.

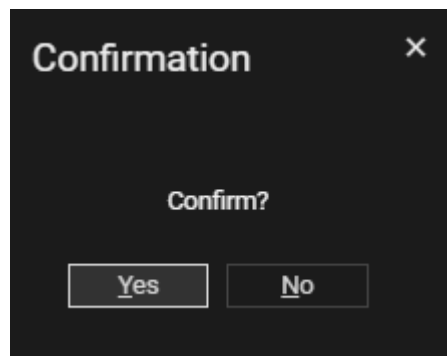

Once you’ve finished entering the notes, press “Esc” and you should see a screen like this:

Press “Quit”

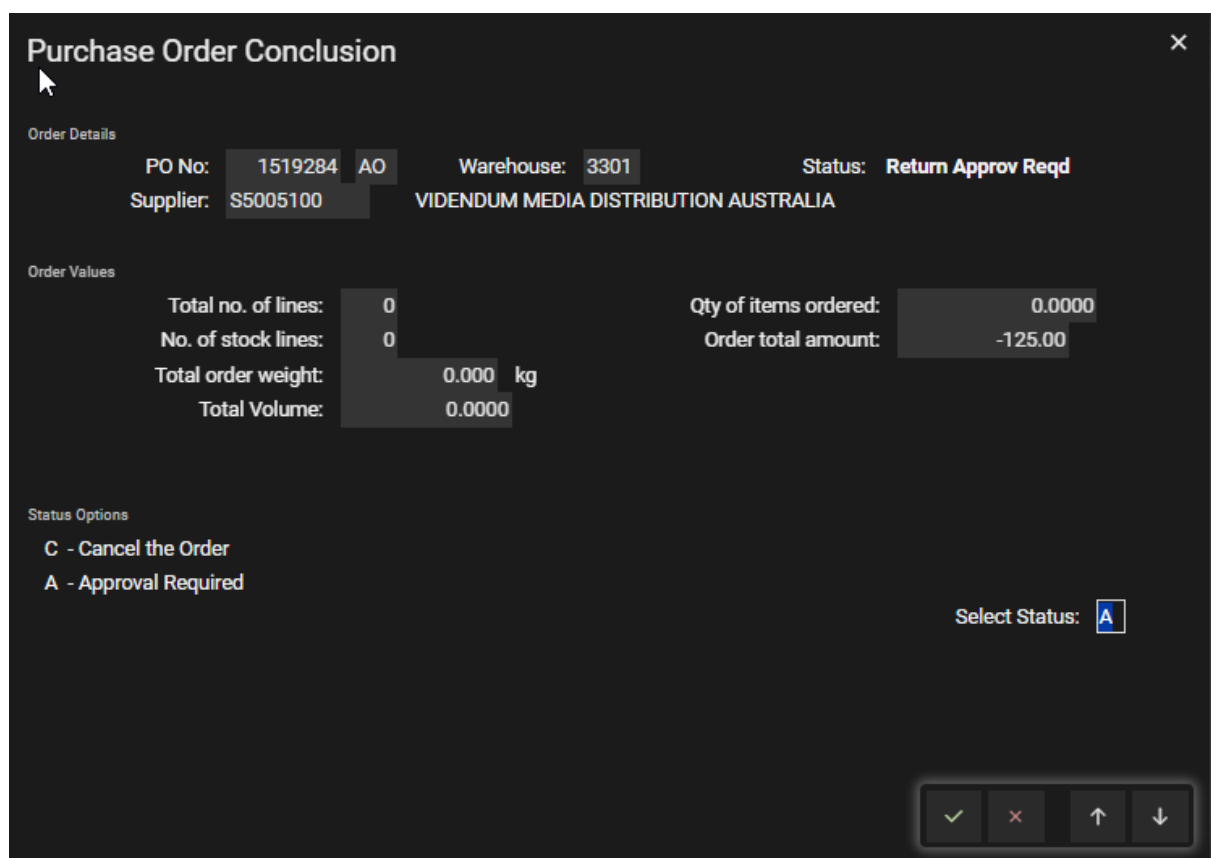

You'll need to confirm this and press "Enter" a couple of times

A dark-themed dialog box titled "Confirmation" with a close button (X) in the top right corner. The text "Confirm?" is centered. At the bottom, there are two buttons: "Yes" and "No".

Once you reach the "Purchase Order Conclusion" screen, enter "A" in the "Select Status" field and press "Enter"

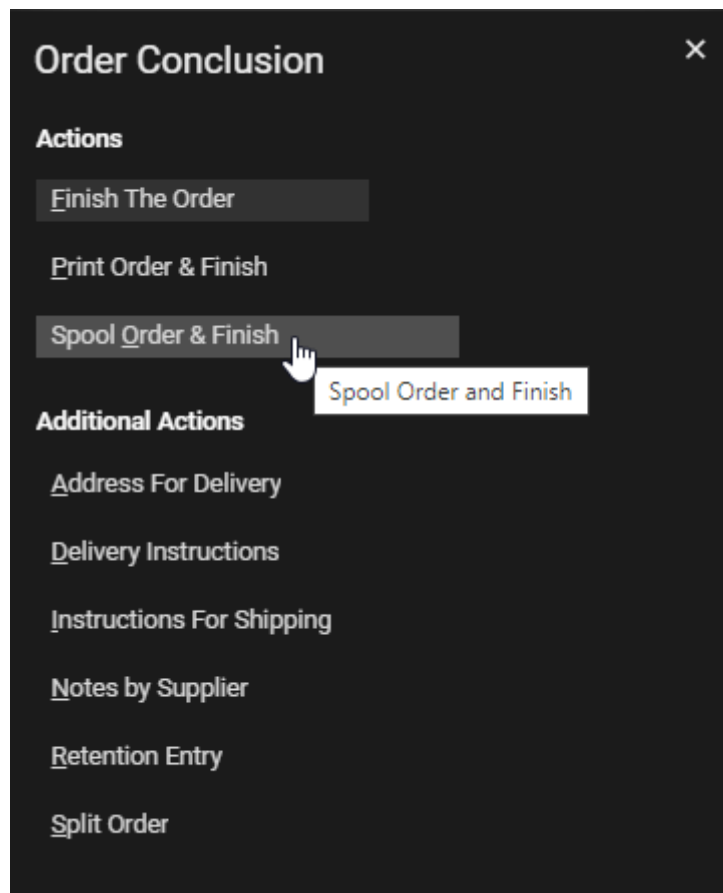

A dark-themed screen titled "Purchase Order Conclusion" with a close button (X) in the top right corner. The screen is divided into several sections:

- Order Details:**
 - PO No: 1519284 AO
 - Warehouse: 3301
 - Status: Return Approv Reqd
 - Supplier: S5005100
 - VIDENDUM MEDIA DISTRIBUTION AUSTRALIA
- Order Values:**

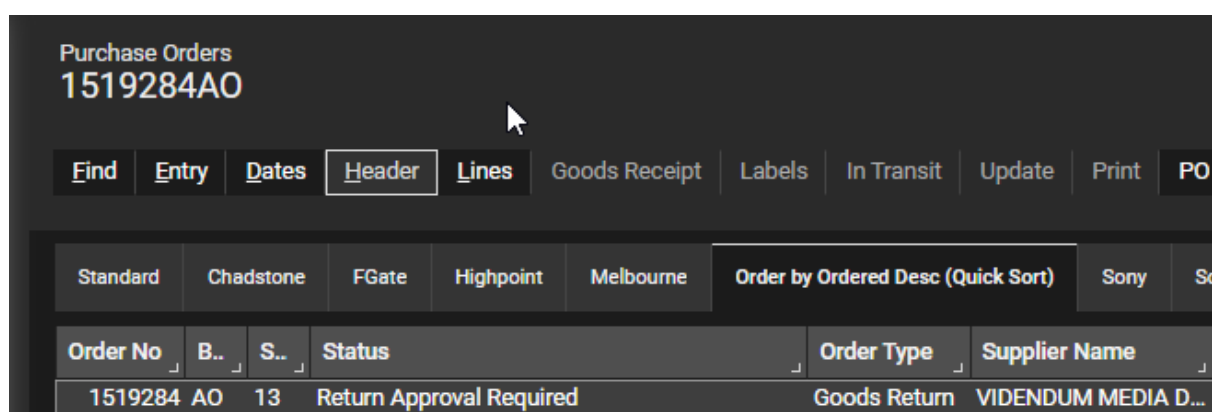

Total no. of lines:	0	Qty of items ordered:	0.0000
No. of stock lines:	0	Order total amount:	-125.00
Total order weight:	0.000 kg		
Total Volume:	0.0000		
- Status Options:**
 - C - Cancel the Order
 - A - Approval Required
- Select Status:** A

At the bottom right, there is a navigation bar with four buttons: a green checkmark, a red X, an up arrow, and a down arrow.

At the “Order Conclusion” stage press “Spool Orders & Finish” and this will finish the process in Pronto.

You will now see a new listing in the Purchase Order screen with a status of “13 Return Approval Required” – once this has been approved and marked “Ready to Print” you’ll need to Update and action this to have the stock removed from your stock file – setting up a filter in this window may help to keep an eye on things.

Once the order is approved, it will be at status “33 Return Ready to Print” – Press the “Print” button

In the Purchase Orders screen you'll see your new Goods Exchange order at status "33 Return Ready to Print" – press "Print"

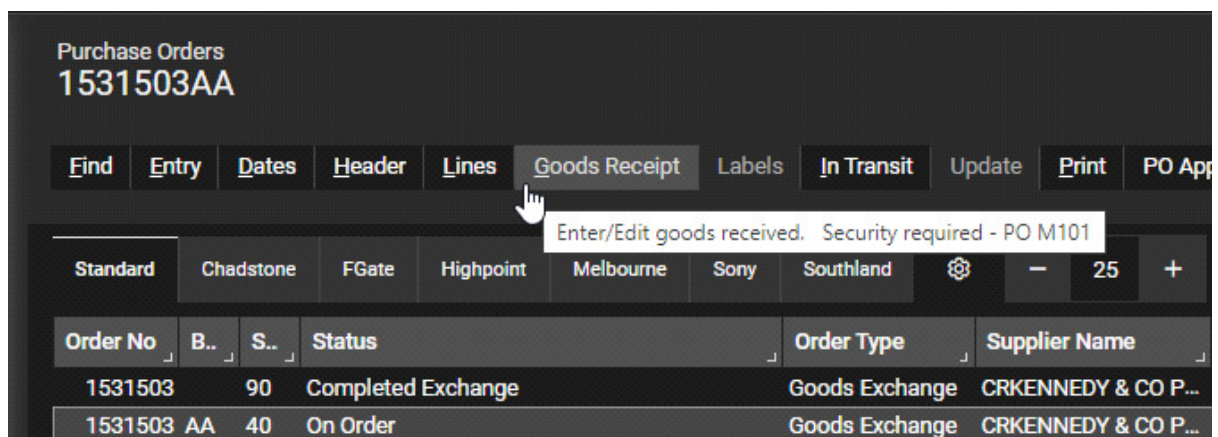

Hit "Enter" twice

You should see the Purchase Return is now at status "55 Ready to Return" – press "Update"

After pressing "Enter" through all the options you should see it is now at status "90 Completed Exchange" and immediately below a new suffixed Goods Exchange order – once the replacement stock arrives receive it on this purchase order as you would a normal purchase order by pressing "Goods Receipt."

Next Steps

After completing the Pronto procedure, follow each suppliers requirements for arranging an RA and sending back the faulty goods.

Purchase Returns once completed shouldn't require any further input, but Purchase Exchanges will need to be received into Pronto as any normal Purchase Order would.

Potential Issues

If a Purchase Return is replaced instead of being credited

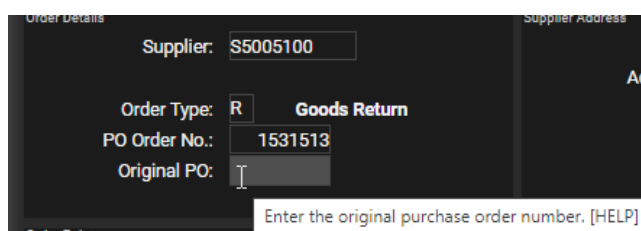

If you process a Purchase Return, and the supplier chooses to replace, rather than provide a credit, process a stock adjustment using the Stock Adjustment Reason code "CSR Credit Stock Replaced" and send an email to accounts@teds.com.au and CC one of the finance team members with the adjustment's batch code.

If a Purchase Exchange is credited instead of being replaced.

If you process a Purchase Exchange and the product is credited instead of being replaced, receive the suffixed Goods Exchange order as if the product had been replaced, then immediately process a Purchase Return against that Goods Exchange order, and send an email to accounts@teds.com.au and CC one of the finance team members with the purchase return number and supplier's credit note number.

If the original Purchase Order was in Acumen, not Pronto

For Purchase Exchanges, as Pronto creates a new order number automatically, there is no change in the process, but for Purchase Returns, instead of typing in a Purchase Order number in the "Original PO.:" field, leave it blank and press "Enter" – Pronto will generate a new order number.

The screenshot shows the 'Order Details' section of the Pronto system. It includes the following fields and values:

- Supplier:** S5005100
- Order Type:** R (Goods Return)
- PO Order No.:** 1531513
- Original PO.:** (Empty field with a cursor)

At the bottom, there is a text box with the placeholder text: "Enter the original purchase order number. [HELP]"

From here, complete the Purchase Return as normal, making sure to note the original Acumen PO and supplier invoice number in the "Notes" fields.
