

CHANGING A REPAIR SERVICE AGENT

Purpose

This SOP outlines the correct process for **changing a repair service agent after a repair has already been sent**, without cancelling or recreating the repair. This ensures deposits, records, and workflows remain intact.

When to Use This SOP

Use this process **only when**:

- A repair has already been sent to a service agent, **and**
- You are advised it was sent to the wrong service agent **or** needs to be redirected elsewhere.

Step 1: Enter Quote Details (Mark as Not Repairable)

1. Open the existing repair order.
2. Select **Next Action on Order**.
3. Choose **Enter Quote**.
4. Complete the fields as follows:
 - **Can item be repaired?** → Enter **N**
 - **Supplier Reference** → Enter reference (if supplied)

The screenshot displays the 'Repair Orders - Warehouse 2301 - All Statuses' interface. A table lists repair orders with columns for Repair N..., Status, and Whse. The order 10004031 is highlighted with the status 'Awaiting Quote'. Two pop-up windows are shown: 'Repair Actions for Order: 10004031' with options like 'Select Repairer', 'Despatch Repair', 'Enter Quote' (selected), 'Advise Customer of Quote', 'Customer Accept/Reject', and 'Notify Repairer Whether To Proceed'; and 'Enter Quote Details' with fields for 'Can Be Repaired' (set to N), 'Repairer Reference' (123456), and 'Promised Date'.

Repair N...	Status	Whse
10003974	Repair Entered	2301
10003983	Repair Entered	2301
10003984	Repair Entered	2301
10004030	Awaiting Cust Pickup	2301
10004031	Awaiting Quote	2301

Repair Actions for Order: 10004031

Actions

- ☐ Select Repairer
- ☐ Despatch Repair
- ☒ Enter Quote
- ☐ Advise Customer of Quote
- ☐ Customer Accept/Reject
- ☐ Notify Repairer Whether To Proceed

Enter Quote Details

Can Be Repaired: N

Repairer Reference: 123456

Promised Date:

Step 2: Repair Status Updates Automatically

- The repair will automatically move to the status **“Repair Not Possible”**.
- No manual status change is required at this stage.

Step 3: Advise Customer (System Step Only)

1. Select **Next Action**.
2. Choose **Advise Customer**.

Important:

You do **not** need to actually contact the customer.

This step is required **only to progress the system workflow** when changing a service agent.

Step 5: Select New Service Agent

1. The next screen will prompt you to **select a new service agent**.
2. Choose the correct service agent from the list.

What happens automatically:

- A **new service purchase order (PO)** is auto-created.
- Any **deposit already paid** remains attached to the repair.
- No financial or repair data is lost.

Step 6: Repair Continues as Normal

- The repair status will revert to **“Awaiting Dispatch”**.
- The repair is now linked to the **new service agent**.
- Continue the repair process as per normal procedures.

Key Notes & Tips

- ✓ Do **not** create a new repair — this process avoids duplication.
- ✓ Deposits are safely retained on the repair.
- ⚠ “Advise Customer” is a **mandatory system step**, not a communication requirement.
- 🔄 This process can be used whenever a repair needs to be redirected after submission.
