

TRADE-IN VOUCHER WITH PARTIAL BANK TRANSFER

Purpose

This standard operating procedure outlines the correct process when a customer completes a trade-in for a trade-in voucher, uses part of the value on a purchase, and requires the remaining balance to be processed via bank transfer.

Scope

This procedure applies to all store team members processing trade-in voucher transactions where full value is not redeemed in-store.

Step 1: Trade-In & Voucher Creation

1: Process Trade-In

- Complete the trade-in as per standard procedure, ensuring customer bank details are collected.
- Finalise and generate the trade-in voucher number.

Step 2: Create Sales Order

1: Add Purchased Products

- Create a new order in POS.
- Add the product(s) the customer wishes to purchase.

2: Add a Miscellaneous Product Line for Remaining Credit

- Add a separate miscellaneous product line.
- Adjust the price so the total order value equals the full trade-in voucher amount.
- Set this miscellaneous line to Back Order status.

Important: This ensures the full voucher value is accounted for in the transaction.

Step 3: Complete the Sale

1: Process Payment

- Apply the full trade-in voucher to the order.
- Finalise the sale for the physical product(s).

Step 4: Process Remaining Balance (Bank Transfer)

1: Process Refund in Pronto POS

- Process a credit note (refund) for the remaining balance.
- Use the Head Office Refund tender type.

Step 4: Process Remaining Balance (Continued)

2: Submit Head Office Refund Request

- Submit a Head Office Refund request form via Connected:
<https://teds.opcentral.com.au/#/cuf/dRuDmi>
- Ensure all required details are completed, including:
 - Customer bank details
 - Refund amount
 - Order reference

Important: The remaining balance will be refunded to the customer via bank transfer by Head Office.

Step 5: Order Notes Requirement

1: Record Notes on the Order

- Team members must leave clear and detailed notes on the order outlining:
 - Total trade-in voucher value
 - Amount used in the sale

Important: Notes must be clear enough that any team member can understand the transaction without additional context.

Key Notes & Tips

- The miscellaneous line must always be set to Back Order.
- The total order value must match the full trade-in voucher amount.
- Only the remaining balance is refunded via Head Office via bank transfer.
- Do not refund directly through POS using standard tender types.
- Clear order notes are mandatory to avoid confusion and reconciliation issues.

Compliance

All team members must follow this process to ensure:

- Accurate financial reconciliation
- Correct handling of trade-in voucher balances
- Proper approval and processing of bank transfer refunds

Failure to follow this process, including not leaving adequate notes, may result in reconciliation errors, delays in customer refunds, or internal confusion.

All refunds must be submitted as a Head Office refund for funds to be transferred to the customer.
