

WORK HEALTH & SAFETY CASH HANDLING POLICY (WHS)

Purpose

The purpose of this policy is to outline the expected cash-handling procedures across Ted's Cameras and Digital Camera Warehouse (DCW) to minimise the risk of cash loss and to protect employees who regularly handle cash. This procedure aims to reduce workplace hazards associated with cash management and should be read in conjunction with the Loss Prevention Procedure.

Scope and Responsibility

This policy applies to all employees and contractors of Ted's Cameras and Digital Camera Warehouse.

Definitions

- **Manager:** Store Manager, Assistant Store Manager (2IC), Third in Charge (3IC), Relief Manager.

Policy Statement

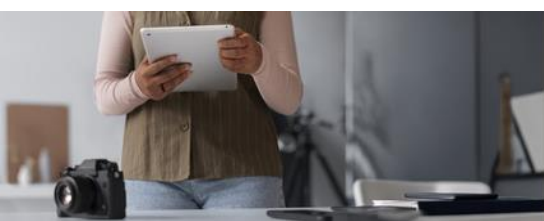

The safety of our employees always takes precedence over the protection of company cash, stock, property, or other assets. While cash handling cannot be entirely eliminated in our retail environments, Ted's Cameras and DCW have implemented administrative and physical controls to minimise risks to our team members and the business.

Administrative Controls

Managers must understand and follow store-specific cash handling procedures and the associated risks. These include:

- Preparing monies for banking
- Transporting monies to the bank
- Identifying risks and hazards associated with banking
- Using store security systems, including personal duress settings
- Ensuring appropriate staffing levels (a minimum of two employees in store at all times)
- Maintaining confidentiality regarding security procedures and devices
- Remaining situationally aware and reporting suspicious behaviour
- Implementing emergency responses during and after robberies, violent incidents, or other crimes
- Providing post-incident support to affected employees
- Reporting hazards and incidents promptly
- Managing employee fatigue and stress levels
- Accessing and understanding WHS information

Employees must proactively report potential cash-handling hazards so risks can be mitigated before an incident occurs.

Physical Controls

- Cash Register or Drawer
- Keep cash drawers closed at all times except when processing a sale.
- Never leave an open drawer unattended.
- Store management must discreetly clear excess cash; all excess must be placed in the safe immediately.
- Remove all notes from drawers at close and store them in the safe.
- Leave all register drawers open overnight.
- Each store must maintain clearly labelled bags for each POS terminal for overnight storage.
- Employees must not borrow money from the store under any circumstances.

Safe

- Access to the safe is restricted to Managers, Assistant Managers, and 3ICs.
- Excess cash must be placed in the safe immediately upon removal from registers.
- The safe must remain locked at all times.
- Storeroom and restricted-access doors must remain closed at all times.

Counter Areas

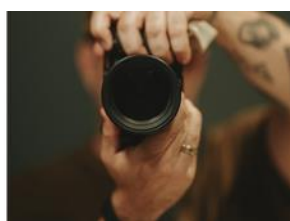

- Customers must not enter behind service counters except via approved customer pathways.
- Sales representatives or contractors must be accompanied by staff when working near POS areas.
- Employees are responsible for maintaining a clean and organised counter environment.

Sales Transactions

- All sales must be conducted in line with company procedures.
- For large cash payments, count the money in front of the customer and request a co-worker to verify.
- Only Australian dollars may be accepted—no foreign currency.
- Monitor for counterfeit notes. If suspected:
 - Ask the customer if they can provide a different payment method (do not accuse).
 - If they cannot, escalate to the Store Manager.
 - After the customer leaves, contact Centre Management security or the Police with full details.
- Do not exchange coins or notes for customers.
- If an EFTPOS transaction is declined, provide the customer with a receipt and keep one for store records.

Change Discrepancies

- Involve the Manager, Assistant Manager, or 3IC immediately.
- If incorrect change is confirmed, issue the correct amount.
- If uncertainty remains, advise the customer that POS will be balanced at the end of trade.
- If the customer is dissatisfied, the Manager must contact the Operations Manager immediately.
- Take the customer's details and explain that the store will contact them once tills are finalised.
- Staff must not allow themselves to be harassed, rushed, or subjected to occupational violence. Seek co-worker support if needed.

Pricing Information

- Sales budgets, targets, and product costs are confidential and must not be discussed on the shop floor.
- Product pricing/invoice pricing must never be shown to customers.

Banking and Cash Handling

Store management is responsible for balancing POS terminals daily. Due to increased risk during this task, the following must be followed:

- Inform other employees when preparing banking so they can monitor the store and limit interruptions.
- Complete balancing during quieter periods; after-hours completion is permitted.
- Finalise each POS terminal separately.
- Investigate any variance over \$10 before proceeding. Report all variances to Accounts the same day.
- Follow up unresolved variances with the Store Manager and the Support Office Accounts team.
- Place individual takings into separate, clearly labelled bags.
- Complete banking as per standard procedure and file documentation accordingly.
- **Under no circumstances is company cash to be taken home.**
- Banking must be deposited the same day or stored securely in the safe overnight.

Counting Cash / Preparing Banking

- Banking preparation should be done off the shop floor, in an area not accessible to customers.
- Limit interruptions during preparation.
- Wherever practicable, have a second staff member verify counts—especially during peak periods.

Control Measures to Minimise Cash Transport Risks

1. Use the closest nominated bank branch for deposits.
2. Banking must be completed on all days the bank is open.
3. Only Store Managers or senior staff may transport cash.
4. Vary people, routes, and banking times where practicable.
5. Deposit cash using the dedicated ATM during daylight hours.
6. Cash must never be taken home or carried on your person after hours.
7. Avoid drawing attention when transporting cash; do not wear branded aprons, and use plain bags rather than branded ones.

During peak trading periods, the company may engage an external security provider to collect store takings.
