

PRIVACY AND CUSTOMER DATA POLICY

1. Purpose

The purpose of this policy is to set clear standards for the collection, use, storage, and protection of customer data across Ted's Cameras and Digital Camera Warehouse (DCW).

This policy ensures compliance with the **Privacy Act 1988 (Cth)** and the **Australian Privacy Principles (APPs)** and safeguards customer trust, brand reputation, and organisational integrity.

2. Scope

This policy applies to all employees, contractors, and representatives of Ted's Cameras and Digital Camera Warehouse who handle or have access to customer data, whether in physical or digital form.

3. Why Compliance Matters

- **Legal Obligation:** The Privacy Act 1988 establishes the APPs, which dictate how personal information must be managed. Compliance is mandatory.
- **Reputational Risk:** Even a minor breach can undermine customer trust, harm our brand, and cause long-term commercial damage.
- **Individual Accountability:** Every staff member is personally responsible for compliance. Ignorance of the law or policy is not a defence.

4. Key Privacy Principles

All team members must comply with the following requirements:

4.1 Collection

- Collect only data that is directly relevant to business purposes.
- Do not collect unnecessary, excessive, or unrelated personal information.

4.2 Use and Disclosure

- Use customer data only for the purpose for which it was collected.
- Do not share customer data outside authorised systems or processes.

4.3 Storage and Security

- Secure all customer data—both digital and physical—against loss, misuse, or unauthorised access.
- Lock screens when unattended and never share system logins.
- Store paper records securely and destroy them by shredding or equivalent secure disposal methods.

4.4 Access and Correction

- Customers have the right to access their personal information and request corrections.
- Any such requests must be referred immediately through the proper compliance channels.

4.5 Data Integrity

- Ensure customer information is accurate, complete, and up to date.
- Outdated or incorrect data increases compliance risk and must be corrected promptly.

5. Internal Expectations

- **Zero Tolerance:** Careless handling of customer data will not be excused.
- **Accountability:** Each employee is individually responsible for compliance.
- **Escalation:** Any suspected or confirmed data breach must be immediately reported to **Rory Moore – National Operations Manager**.
- **Training & Awareness:** Mandatory refresher training will be conducted regularly, and participation is compulsory.

6. Breach Management

Under the **Notifiable Data Breaches (NDB) scheme**, the organisation must assess any suspected breach within 30 days and notify the Office of the Australian Information Commissioner (OAIC) and affected customers if there is a risk of serious harm.

Policy Requirement:

- All suspected or confirmed breaches must be reported immediately.
- Staff must not attempt to resolve, conceal, or downplay incidents independently.

7. Consequences of Non-Compliance

- **Legal Penalties:** Breaches of the Privacy Act 1988 can result in significant fines and sanctions.
- **Disciplinary Action:** Staff who fail to comply may face disciplinary measures, up to and including termination of employment.
- **Commercial Impact:** Mishandling customer data damages reputation, drives customer attrition, and causes financial loss.

8. Policy Commitment

Protecting customer data is not optional—it is a **legal requirement** and a **core brand value**. With the acquisition of DCW, our obligations have increased and our margin for error has narrowed.

Every employee is expected to treat customer information with the same care and security as they would their own.
