

Incident & Emergency Management Procedure

Version 1

	Ted's Cameras	Version: 3
Number 11	Incident & Emergency Management Procedure	Issue Date: 23/08/2022

Incident & Emergency Management Procedure

1. Purpose

Ted's Cameras understands the importance of accurate reporting and record keeping of all incidents, hazards and near misses, be they major or minor. It is important that all incidents are correctly documented and recorded in a timely manner. Furthermore this will ensure that all relevant parties are informed and made aware of any incident occurring and that remedial action can be taken to ensure the health and safety of all employees.

2. Scope: Responsibility

WHS Coordinator: populating and maintaining Incident and Hazard Monitoring and reporting to management and Work Health and Safety Committee (WHSC) and Directors.

Human Resources: escalation point for issues impacting employees and health and

All Staff: reporting Incidents, hazards and near misses

3. Definition

Manager: Manager, Assistant Store Manager, relief Manager, Line Manager

Incident: an event that is out of the ordinary for the everyday running of the business. This may include but is not limited to:

An employee or customer being injured on site

A near miss: is an unplanned event that did not result in injury, illness, or damage – but had the potential to do so. Only a fortunate break in the chain of events prevented an injury, fatality or damage; in other words, a miss that was nonetheless very near.

Property Damage

Other

Suspected theft or property

Security needing to be called

Any other event that an employee believes needs to be reported

Hazard: Anything with a potential cause to harm and fall into six (6) categories:

1. Physical– Slippery floors, objects in walkways, unsafe or misused machinery, excessive noise, poor lighting, fire.
2. Chemical– Gases, dusts, fumes, vapours and
3. Ergonomic– poor design of equipment, workstation design, (postural) or workflow, manual handling, repetitive movement.
4. Radiation– Microwaves, infra-red, ultraviolet, lasers, X-rays and gamma
5. Psychological– Shift work, workload, dealing with the public, harassment, discrimination, threat of danger, constant low-level noise, stress.
6. Biological– Infection by bacteria, virus, fungi or parasites through a cut, insect bite, or contact with infected persons or contaminated object.

Some items are hazardous by nature, while others only become hazardous if used inappropriately or carelessly. Often, accidents do not just happen – they are a result of workers neglecting or ignoring hazardous situations.

The risk is the chance, high or low, that somebody could be harmed by these and other hazards, together with an indication of how serious the harm could be.

4. Procedure

Incidents

All incidents involving the Company's activities and workplaces are to be reported immediately, investigated if required and appropriate corrective action plans put in place to prevent a recurrence.

When an incident has occurred, or a hazard identified, an **Incident or Hazard Report Form** should be completed online.

Ted's Cameras Group Employees:

Incident report for Injuries - <http://intranet.bajle.com/mod/page/view.php?id=2147>

Hazard/Near Miss Report - <http://intranet.bajle.com/mod/page/view.php?id=2148>

If you are unsure as to whether an event is an incident or not, please complete the form anyway. It is better to have a record of any event.

Upon receipt of an **Incident or Hazard Report Form**, WHS / Human Resources will take appropriate action, or refer the issue to the relevant Executive for appropriate action. Incident data is summarised and regularly reviewed by the WHSC and management as part of the risk management process.

Incident, Hazard & Corrective Actions Registers

Once the incident or hazard has been actioned and resolved, the **Incident or Hazard Report Form** will be filled out and stored by WHS Coordinator. The Incident data will also be recorded in the **Incident and Risk Register**.

The WHS Coordinator maintains a register of all incident, hazards and near misses and central corrective actions so that any trends can be identified, gauged and for reporting on WHS performance and activities. Any corrective actions will be recorded in the appropriate local or central **Corrective Actions Register**.

Local **Corrective Actions Registers** are the responsibility of each Store Manager / Manager of area and are used to track the completion of actions required at the Store / Management area.

First Aid in the workplace

Ted's Cameras recognises that part of its obligations to provide a healthy and safe working environment is the provision of emergency management first aid program.

Where a store is not located in a shopping centre and does not have access to a First Aid Office the Company will ensure each location has a minimum of one trained First Aid Officer and that all locations are provided with a suitably equipped first aid kit, appropriately trained first aid personnel and access to a local medical centre.

Selected employees (usually Store Manager or Assistant Manager) are trained in the delivery of First Aid with a specialist external training provider. The Company will pay for all the costs associated with the training. The names of all trained First Aid Officers will be displayed on the intranet and / or noticeboard and sign-posted near First Aid Kit.

First Aid kits will be available in each location including Support Office

These First Aid kits will be identified by prominent First Aid signs and the location and access arrangements will form part of each new employee's induction process.

Manager Responsibilities

The First Aid kits will be subject to monthly replenishment of items stores, that is the responsibility of the Store Manager and WHS Coordinator for head office.

Managers are responsible for ensuring that anyone who is injured or sick gets home safely, is escorted to a medical centre, or is accompanied in an ambulance.

All incidents, that require First Aid attention, are recorded on **Incident Report Forms**.

Managers are responsible for ensuring that incident reports and/or investigations are completed where incidents occur; and ensuring the appropriate people are informed in the event of a serious illness or injury.

Maintaining and publishing site emergency contacts lists.

Assisting with first aid risk assessments.

First Aid Officer Responsibilities

Responding promptly to provide assistance for injury / illness as required, while always working within their

level of competence.

Seeking assistance from management to ensure that sick and injured staff get home safely, are escorted to a medical centre, or, are accompanied in an ambulance.

Keeping confidential all personal information received in the course of their duties – medical information should only be released to medical staff.

Encouraging anyone who complains of an occupational injury to have it recorded.

Attending first aid training as required.

WHS Co-ordinator Responsibilities

Coordinating First Aid risk assessments.

Coordinating Incident Investigations.

Maintaining First Aid Kit at Support Office.

Maintaining national register of First Aid Officers and coordination of training for appointed as First Aid Officers.

Employees and Contractor Responsibilities

Reporting all injuries to their Manager, or First Aid Officer.

Taking reasonable care for the health and safety themselves and others.

Locating a First Aid Officer

In an emergency it must be easy to find a First Aid Officer. Emergency contacts lists and standardised signs make it easy for people to find their nearest First Aid Officer.

An emergency contact list needs to be maintained at each workplace / store. This list is maintained by management for Stores and WHS Coordinator for support office and identifies First Aid Officer, Fire Wardens, and OH&S representatives. It is also displayed on the emergency notice-board at each site and for the offices, published on the intranet.

External Incident Notification

Where an incident requires government reporting, (e.g. WorkCover / WorkSafe, EPA or Health Department) only authorised persons are to forward this to the relevant government authority. The CEO (with assistance from the WHS Coordinator) has primary responsibility from this task. The CEO must also be notified of any reported incidents asap.

Employee, occupiers and people who are in control of workplaces and high risk equipment and required by law to notify WorkSafe about incidents involving work health and safety, dangerous goods as well as explosives.

Where a death or other notifiable incident occurs, the accident scene is to be preserved until permission is granted by a WorkSafe inspector, except actions necessary to save life, relieve suffering or to prevent further property damage.

WorkSafe Notifiable Incidents

Notification is required where an incident at a workplace results in:

Death or serious injury.

Serious injury in this context means those incidents that result in the consequences described in section 37(1) of the OHS Act 2004. Similar definitions are contained in each State legislation and can be accessed via the State regulator websites.

They include, but are not limited to, incidents that result in a person requiring:

Medical treatment within 48 hours of exposure to a substance

Immediate treatment as an in-patient in a hospital

Immediate medical treatment for:

Amputation

Serious head injury

Serious eye injury

Separation of skin from underlying tissue (for example: de-gloving or scalping)

Electric shock

Spinal injury

Loss of bodily function

Serious lacerations

Dangerous occurrences which may involve fire, explosion, gas leak etc. also require notification regardless of whether or not anyone is injured.

Energy Safe must also be notified if there is a gas leak or electrical incident.

Incident Investigation

Any incident that occurs will require an investigation in order to prevent a reoccurrence. That investigation may be internal or external and may vary in size depending on the nature of the incident. The CEO in consultation with the WHS Coordinator will determine the extent of investigation, and appropriate consultation via the WHSC will occur.

Emergency Management

Ted's Cameras is committed to the safety and well-being of all employees, contractors, suppliers, visitors and customers who enter our premises. With this in mind, we have developed emergency management plans for each of our premises. By implementing standard procedures, there is less risk of injury and / or loss of life. In some location Emergency Management Plans and evacuation drills are managed by Centre Management in the particular shopping centre. Plan must be displayed in a prominent area of the premises.

The Emergency Plans detail the various types of emergencies that could occur and the planned response. The plans are designed to give warning of imminent danger and to allow personnel to move to safe place. Managers at each location are responsible for ensuring that all employees are informed of, and are fully conversant with, emergency procedures.

We have identified all potential emergency situations and documented procedures for preventing and mitigating the associated illness and injury. We review and make changes, where necessary, to the emergency management plans, in particular, after the occurrence of incidents or emergency situations.

Wardens are appointed for each site to assist with evacuation. Periodic evacuation drills are conducted in accordance with legislative requirements. All emergency personnel are given adequate instruction and training to ensure their effectiveness.

Fire

Ted's Cameras and/or landlords engage contractors to manage and maintain its fire prevention and firefighting equipment.

All employees must be familiar with the location of emergency exits, and the designated assembly area.

Smoking and vaping is prohibited inside all Company controlled premises.

Exits, stairwells and aisles must remain clear of products and clutter.

Electrical equipment is to be tested and tagged as per relevant Australian Standard.

Fire extinguishers should be serviced in accordance with the Essential Safety Measures and AS 1851 (as amended) and must be easily accessible at all times.

Any employee who is aware that a fire extinguisher has been used or appears to have been tampered with should notify their manager immediately.

Fire extinguishers are not to be used for any purpose other than for extinguishing fire.

An Annual Essential Safety Measures Report

An Annual Essential Safety Measures Report is to be supplied by each landlord and posted in the foyer of each location. Each Store Manager needs to ensure this is displayed and updated annually.
